## ACCESS SERVICE

9. Directory Assistance Access Service9.1 General

Directory Assistance (DA) Access Service provides access to Telephone Company Directory Assistance Service locations (DA locations), use of DA access equipment and use of DA operators. DA Access Service provides for the ability to terminate calls from a customer's premises to a Telephone Company DA location to obtain telephone listing information.

The following diagrams depict a generic view of the components of DA Access Service and the manner in which the components are combined to provide a complete Access Service.

## DIRECTORY ASSISTANCE ACCESS SERVICE

## ACCESS SERVICE

9. Directory Assistance Access Service9.2 Service Description

- (A) Upon being furnished a name and locality by the customer's end user, the Telephone Company DA operator will provide or attempt to provide the telephone number listed in the Telephone Company DA records associated with the name given. The Telephone Company's contact with the customer's end user is limited to that effort necessary to provide a customer's end user's request for a telephone number; and the Telephone Company will not transfer, forward or redial a customer's end user's call to any other location for any purpose other than the provision of DA Service.
- (B) DA operators will respond to a maximum of two (2) telephone number requests per call to the DA operator. A telephone number which is not listed in DA records will not be available to the customer's end user. When the DA location or DA operator equipment or terminals are out of service due to a Telephone Company equipment failure, or an incorrect number is provided, a credit will apply as specified in 9.4.5 (Credit Allowance for DA Service). Telephone Company DA Access Service is not available for 800-555-1212 traffic. (T)
- (C) The Telephone Company will distribute the calls received over the DA Access Service to the DA operators using the DA location access equipment. The Telephone Company will specify the DA location which provides the DA Service for each Numbering Plan Area code (NPA). The DA locations are specified in the National Exchange Carrier Association, Inc., Tariff F. C. C. No. 4 (NECA No. 4), Wire Center and Interconnection Information. When the Telephone Company determines it necessary to change a DA location, the involved customer will be notified by the Telephone Company six months prior to the change. For such changes, the regulations specified in 2.1.4(F) and (G) will apply.

(This page filed under Transmittal No. 2264)

Issued: March 1, 1993

Effective: May 1, 1993

1010 Pine Street, St. Louis, Missouri 63101

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.3 Service Provisioning9.3.1 Manner of Provisioning

- (A) DA Access Service is a terminating service only. Terminating traffic represents access capacity for all LATAs within the NPA for carrying traffic from the customer to the DA location.
- (B) Transport of Directory Assistance Access Service is provided between the customer's premises and a particular DA location using the Switched Transport facilities set forth in Section 6.5 (Switched Transport). These facilities include:
- Entrance Facility for the transport of the DA Access Service call from the customer's premises to the Telephone Company's serving wire center
  - Direct-Trunked Transport facility for transport of the DA Access Service Call from the Telephone Company's serving wire center to the DA location without routing through an access tandem
  - Tandem-Switched Transport facility for transport of the DA Access Service Call from the Access Tandem to the DA location. Tandem-Switched Transport includes the switching functions performed by the access tandem (C)

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates to allow it to calculate its price cap formulas to exclude USF contributions from the operation of the X-factor, or in the event of any other adjustment pursuant to an order of the Commission or a court.

Effective: July 1, 1998

One Bell Plaza, Dallas, Texas 75202

(T)

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.3 Service Provisioning (Cont'd)9.3.1 Manner of Provisioning (Cont'd)

(C) At the customer's option and where technically feasible, DA Access Service may either be provided over trunk groups dedicated to DA Access Service or it may be combined with the customer's FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service as set forth in (1) and (2) following. (T)

(1) Dedicated Trunk Groups (T)

When the customer requests trunk groups dedicated to DA Access Service, a Direct-Trunked Transport facility is required to transport the DA Access Service Call from the Telephone Company's serving wire center to the DA location. An Entrance Facility for the dedicated trunk groups is also required for transport of the DA Access Service Call from the customer premises to the serving wire center. When dedicated trunk groups are requested, address signaling is not provided on either the Entrance Facility or the Direct-Trunked Transport. (C)

When dedicated trunk groups are requested, the Telephone Company may require the customer to order a separate trunk group for each NPA. Separate trunk groups will be required when the Telephone Company notifies the customer that the mechanized search of its data base and its mechanized operator practices require a mechanized identification of the NPA code for which the customer's end user desires DA information. (T)  
(M)  
(M)

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.3 Service Provisioning (Cont'd)9.3.1 Manner of Provisioning (Cont'd)

(C) (Cont'd)

(2) Combined Trunk Groups

(T)

When the customer requests to have DA Access Service combined with FGB, FGC, FGD, BSA-B, BSA-C or BSA-D traffic, a Tandem-Switched Transport facility is required (i.e., DA Access Service can only be combined with tandem routed trunk side Switched Access Services). An Entrance Facility for the trunk groups combining the trunk side Switched Access Service and the DA Access Service is also required for transport of the DA Access Service Call from the customer premises to the serving wire center. When DA Access Service is combined with tandem routed trunk side Switched Access Services, wink start-start pulsing signaling is provided at the access tandem switch. (C)

DA Access Service using combined trunk groups allows for transport of the DA Access Service call (1-411, 555-1212 or NPA-555-1212) from the customer's premises to the access tandem to the DA location. However, only NPA codes handled by the DA location served by the access tandem switch will be processed. (T) (M)

(D) Trunk side switching is provided at the DA location. (T)

(E) DA Access Service is ordered under the provisions specified in Section 5 (Ordering for Access Service). Also included in that section are charges associated with ordering DA Access Service. (T) (M) (T) (T)

Material and revised material appearing on this page formerly appeared on Original Pages 9-4 and 9-5.

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.3 Service Provisioning (Cont'd)9.3.3 Interface Groups

- (A) Switched Transport Interface Groups 2 through 9, as specified in 6.7.6 (Interface Groups), are provided for terminating the Directory Transport at the customer's premises. In addition, for each Interface Group, premises interface codes are available as a function of the Telephone Company switch supervisory signaling and Switched Access feature group. These premises interface codes are also specified in 6.7.6. (T)
- When DA Service is provided over FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service, the premises interface code for the combination will be the available premises interface code provided for the FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service ordered by the customer.
  - When DA Service is provided over access service trunk groups dedicated for DA traffic, the following premises interface codes are available:
- |         |        |        |
|---------|--------|--------|
| 4DS9-15 | 6EA2-E | 4RV2-0 |
| 4DS9-31 | 6EA2-M | 4AH5-B |
| 4DS0-63 | 4SF3   | 4AH6-C |
| 4DS6-44 |        | 4AH6-D |
| 4DS6-27 |        |        |
- (B) Except as specified in 9.4.4 (DA Minimum Period), the interface groups and premises interface codes provided for DA Access Service utilizing Direct-Trunked Transport facilities are subject to the ordering conditions specified in Section 5 (Ordering for Access Service). For purposes of applying the ordering regulations, a DA location is considered to be a customer's end user's serving wire center. (T)

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont' d)9.3 Service Provisioning (Cont' d)9.3.4 Transmission Specifications

DA Access Service is provided with either Type A or Type B transmission specifications described in 6.7.8 (Transmission Specifications). The specifications for the associated parameters are guaranteed to the DA location, whether routed directly or via an access tandem. (T)

(A) When DA Access Service is provided over trunks dedicated to DA traffic, transmission specifications are provided as follows: (T)

- Type B transmission specifications are provided with interface groups 2 through 9 when routed direct to a DA location (T)

(D)

(B) When DA Access Service is combined with a customer's FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service transmission specifications are provided as outlined below: (D)

- Type B transmission specifications are provided with interface groups 2 through 9 when DA Access Service is combined with FGB or BSA-B Switched Access Service (T)
- Type B transmission specifications are provided when DA Access Service is combined with FGC or BSA-C Switched Access Service
- Type A transmission specifications are provided when DA Access Service is combined with FGD or BSA-D Switched Access Service

(This page filed under Transmittal No. 2295)

1010 Pine Street, St. Louis, Missouri 63101

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont' d)9.3 Service Provisioning (Cont' d)9.3.6 Testing(A) Acceptance Testing

At no additional charge, the Telephone Company will, at the customer's request, cooperatively test, at the time of installation, the following parameters:

- loss,
- C-notched noise,
- C-message noise,
- 3-tone slope,
- d.c. continuity, and
- operational signaling.

When the Directory Transport is provided with interface groups 2 through 9, and the transport termination is two-wire (i.e., there is a four-wire to two-wire conversion in Directory Transport), balance parameters (equal level echo path loss) may also be tested. (T)

For DA Transport using a DS1 or a DS3 connection as specified in 6.5 (Switched Transport), acceptance tests will include tests applicable to the connection as specified in Technical Reference TP 76625. (N)  
(N)

(This page filed under Transmittal No. 2295)

Issued: September 1, 1993

Effective: December 1, 1993

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.3 Service Provisioning (Cont'd)9.3.6 Testing (Cont'd)(B) Testing Capabilities

In addition, to the acceptance tests described above, which are included with the installation of service, Additional Cooperative Scheduled Testing and Manual Scheduled Testing are available as described in 13.3.6 (Testing Services for Switched Access Service). For DA Transport facilities, as set forth in 9.3.1 (Manner of Provisioning), Additional Cooperative Testing and Nonscheduled Testing are available as described in 13.3.7 (Testing Services for Special Access Service, MegaLink Custom Service and Self-healing Transport Network (STN)).

(T)  
(N)

(N)

The following testing capabilities are available on an ongoing basis when DA Access Service is combined with FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service and routed through an access tandem to the DA location:

In the terminating direction, where equipment is available, FGB, FGC, FGD, BSA-B, BSA-C and BSA-D are provided with:

- seven digit access to balance (100 type) test line,
- milliwatt (102 type) test line,
- nonsynchronous or synchronous test line,
- automatic transmission measuring (105 type) test line,
- data transmission (107 type) test line,
- loop around test line,
- short circuit test line, and
- open circuit test line.

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont' d)9.4 Rate Regulations

This section contains the specific regulations governing the rates and charges which apply for DA Access Service. There are three types of rates and charges that apply to the various rate categories of DA Access Service. These are nonrecurring charges, monthly recurring rates (including fixed and per mile rates) and usage rates.

(C)

(C)

Specific rates and charges are set forth in 9.5 (Rates and Charges). Jurisdictional Reporting Requirements for DA Access Service are as set forth in 2.4 (Jurisdictional Reports). Ordering, rating and billing procedures as specified in 2.6 (Jointly Provided Access Service) will apply for access services where more than one Exchange Telephone Company is involved.

(This page filed under Transmittal No. 2295)

Issued: September 1, 1993

Effective: December 1, 1993

1010 Pine Street, St. Louis, Missouri 63101

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.1 Rate Categories

There are three rate categories which apply to DA Access Service:

- DA Service Call (described in (A) following), and (D)
- Directory Transport (described in (B) following), (T)

In addition, Switched Access nonrecurring charges may apply as specified in 6.8.2 (Nonrecurring Charges).

(D)

|

(D)

(A) DA Service Call (T)

The DA Service Call rate category provides for the use of Telephone Company DA equipment and DA operators.

(B) Directory Transport (T)

The Directory Transport rate category provides for the transmission facilities and transport termination used for DA Access Service in transporting a call between the customer's premises and the DA location.

Directory Transport provides a two-way voice frequency transmission path using facilities determined by the Telephone Company, as set forth in 6.5 (Switched Transport), which permit the transport of calls in the terminating direction (from the premises of the ordering customer to the DA location).

(This page filed under Transmittal No. 2788)

Issued: October 26, 1999

Effective: November 2, 1999

One Bell Plaza, Dallas, Texas 75202

(T)

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont' d)9.4 Rate Regulations (Cont' d)9.4.2 Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation or change to an existing service.) Nonrecurring charges are applicable for installation of services, installation of DA Transport facilities, installation of features, and for certain service rearrangements. In addition, an Access Order Charge may be applicable as specified in 5.3.1 (Access Order Charges). (C)  
(C)

The nonrecurring charges which apply for DA Access Service are the applicable nonrecurring charges for Switched Transport facilities and FGB, FGC, FGD, BSA-B, BSA-C and BSA-D Switched Access Service as described in 6.8.2 (Nonrecurring Charges). (C)  
(C)  
(T)

(This page filed under Transmittal No. 2295)

Issued: September 1, 1993

Effective: December 1, 1993

1010 Pine Street, St. Louis, Missouri 63101

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates(A) General

Monthly recurring rates (including fixed and per mile rates) are flat recurring rates that apply each month or fraction thereof that a specific rate category is provided. For billing purposes, each month is considered to have thirty (30) days. Usage rates are rates that apply on a per unit basis (e.g., per call or per call per mile) when a specific rate element is used. Usage charges are accumulated over a monthly period.

(D)

(D)

(B) DA Service Call

(T)

The DA Service Call is a usage rate which applies for each call that has been answered by or forwarded to a DA operator. The number of calls answered by or forwarded to DA operators will be accumulated by Telephone Company measuring equipment. The charge applies whether or not the DA operator provides the requested telephone number.

(This page filed under Transmittal No. 2788)

Issued: October 26, 1999

Effective: November 2, 1999

One Bell Plaza, Dallas, Texas 75202

(T)

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport

(T)

The Directory Transport rate element is composed of the following:

- Entrance Facility
- Direct-Trunked Transport
- Tandem-Switched Transport (which is composed of a Tandem-Switched Directory Transmission rate and a Directory Tandem Switching rate).

Rates for Directory Transport are specific to the subcategory being provided and are described below:

(1) Entrance Facility

A monthly rate applies to each Entrance Facility provided for DA Access Service on either a per point of termination basis (for Voice Grade) or on a per type of connection basis (for DS1 and DS3). The monthly rate is set forth in 6.9.2 (Rates and Charges).

When the Entrance Facility is dedicated to DA Access Service, the monthly rate for the Entrance Facility applies. When DA Access Service is provided over a Switched Transport Entrance Facility that combines both DA Access Service and Switched Access Service, only one Switched Transport Entrance Facility charge applies.

(This page filed under Transmittal No. 2788)

Issued: October 26, 1999

Effective: November 2, 1999

One Bell Plaza, Dallas, Texas 75202

(T)

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport (Cont'd)

(T)

(2) Direct-Trunked Transport

For each Direct-Trunked Transport facility provided for DA Access Service, the following monthly rates apply:

- a fixed monthly rate
- a monthly rate per mile

on a per connection type basis (i.e., Voice Grade, DS1 or DS3). The monthly rates are set forth in 6.9.2 (Rates and Charges). Mileage measurement is set forth in (4) following.

The monthly rates for Direct-Trunked Transport apply only when the Direct-Trunked Transport facility is dedicated to DA Access Service. When DA Access Service is provided over a Switched Transport Direct-Trunked Transport facility that combines both DA Access Service and Switched Access Service (i.e., some of the channels in the facility transport only DA Access Service and other channels in the facility transport only Switched Access services), only one Direct-Trunked Transport rate applies.

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates to allow it to calculate its price cap formulas to exclude USF contributions from the operation of the X-factor, or in the event of any other adjustment pursuant to an order of the Commission or a court.

(This page filed under Transmittal No. 2788)

Issued: October 26, 1999

Effective: November 2, 1999

One Bell Plaza, Dallas, Texas 75202

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport (Cont'd)

(T)

(3) Tandem-Switched Transport

Tandem-Switched Transport is provided as four sub-elements:

- Tandem-Switched Directory Transmission
- Directory Tandem Switching
- Dedicated Tandem Trunk Port
- Tandem DA Location Multiplexing

The application of the Tandem-Switched Transport sub-elements is set forth in (a) and (b) following.

(a) Tandem-Switched Directory Transmission

A per call rate and a per call per mile rate applies to each DA call which has been answered by or forwarded to a DA operator when the transport was provided using a Tandem-Switched Transport facility. Mileage measurement is described in (4) following.

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates to allow it to calculate its price cap formulas to exclude USF contributions from the operation of the X-factor, or in the event of any other adjustment pursuant to an order of the Commission or a court.

(This page filed under Transmittal No. 2788)

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport (Cont'd)

(T)

(3) Tandem-Switched Transport (Cont'd)(b) Directory Tandem Switching

A rate per call applies to each DA call which has been answered by or forwarded to a DA operator when the transport was provided using a Tandem-Switched Transport facility.

- Tandem Switched Directory Transport

Tandem-Switched Directory Transmission rates apply to the mileage measured from the access tandem to the DA location. Directory Tandem Switching is also applied for the switching functions of the access tandem.

- Direct-Trunked Transport

Direct-Trunked Transport rates apply to mileage measured from the serving wire center to the access tandem. The customer can also specify routing to hubbing locations between the serving wire center and the access tandem.

If intermediate hubbing is requested, mileage between hubs is also measured as set forth in 6.8.5 (Determining Switched Transport Mileage and Charges). Tandem-Switched Directory Transmission rates are applied to the mileage measured from the access tandem to the DA location. Directory Tandem Switching is also applied for the switching functions of the access tandem.

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates to allow it to calculate its price cap formulas to exclude USF contributions from the operation of the X-factor, or in the event of any other adjustment pursuant to an order of the Commission or a court.

(This page filed under Transmittal No. 2788)

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport (Cont'd)(3) Tandem-Switched Transport (Cont'd)(c) Tandem DA Location Multiplexing

(T)

A per call charge applies for the use of the multiplexing equipment on the DA location side of the access tandem.

(d) Dedicated Tandem Trunk Port

(T)

A monthly rate applies, per port, for each dedicated trunk on the serving wire center side of the access tandem.

(4) Mileage

The mileage for Directory Transport is measured from the serving wire center for the premises of the ordering customer to the DA location. These two wire centers may be in different LATAs. In addition, the premises of the ordering customer must be in the LATA where DA Service is requested or in the LATA of the DA location. The measurement will be performed and charges determined as described in 6.8.5 (Determining Switched Transport Mileage and Charges).

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont' d)9.4 Rate Regulations (Cont' d)9.4.4 DA Minimum Period

DA Access Service is provided for a minimum period of six months. A minimum period of six months applies for each additional period of service ordered or extended.

If DA Access Service is discontinued prior to the end of each six month period, the charges that apply for the remaining months are the non-recoverable costs less estimated net salvage. Non-recoverable costs include the non-recoverable cost of equipment and material ordered, provided or used, plus the non-recoverable cost of installation and removal including the costs of engineering, labor, supervision, transportation, rights-of-way and other associated costs.

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.5 Credit Allowance for DA Service

(T)

(A) Per call credits will be allowed for DA Service Call, DA Interconnection Charge and Tandem-Switched Transport in the following situations. The customer shall report such calls and include the following information.

(1) Telephone Company Equipment Failure

When a DA call is not completed because the DA location or DA operator equipment or terminals are out of service due to a Telephone Company equipment failure, a credit allowance is applicable.

The customer shall report such calls and include the DA number dialed, the time of the call and the date of the call. The number of calls for which a credit will apply will be developed by the Telephone Company in cooperation with the customer.

(2) Incorrect Number

When a DA operator or DA equipment provides an incorrect number for a call, a credit allowance is applicable.

The customer shall report such calls and include the number requested, the number provided and the reason the number provided is incorrect. The number of calls for which a credit will apply will be developed by the Telephone Company in cooperation with the customer.

Material is filed under authority of Special Permission No. 97-234 of the F. C. C. and withdraws material issued under Transmittal No. 2650 to become effective August 6, 1997.

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.5 Credit Allowance for DA Service (Cont'd)

## (A) (Cont'd)

(3) Application of Credit Allowance

- The amount of credit to be applied per call is the sum of all DA Service per call rates (i.e., DA Service Call and Tandem-Switched Transport per call rates). These rates are set forth in 9.5 (Rates and Charges). (D)
  - The credit allowance for the Switched Access usage sensitive portion of the call in the originating LATA of the DA call is as specified in 9.5(Switched Access Service Credit Allowance for DA Calls). (T)
  - No credit is applicable when the telephone number is unavailable to the DA Operator.
- (B) Credit allowances for monthly recurring rates are only available for service interruptions and will be provided as set forth in 2.5.6 (Credit Allowance for Service Interruptions) and 2.5.7 (Service Assurance Warranty Schedule).

(This page filed under Transmittal No. 2788)

Issued: October 26, 1999

Effective: November 2, 1999

## ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.6 Moves

(T)

A move involves a change in the physical location of one of the following:

- The point of termination at the customer's premises.
- The customer's premises.

Moves will be treated and charged for as specified in 6.8.10 (Moves). When the move involves a change in the physical location of the customer's premises, minimum period requirements will be established at the new location as specified in 6.8.10 and the customer will remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

Material is filed under authority of Special Permission No. 97-234 of the F.C.C. and withdraws material issued under Transmittal No. 2650 to become effective August 6, 1997.

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements10.1 General

This section covers Specialized Services or Arrangements that are provided to a customer for use only by agencies or branches of the Federal Government and other users authorized by the Federal Government, and includes the Telecommunications Service Priority (TSP) System procedures administered by the National Communications System (NCS) and the Federal Government Telecommunications Services (FGTS). (T)

Some of the services described in this section are provided for command and control communications, state emergency operations centers, communications for national security, emergency preparedness, and presidential requirements. They are required to assure continuity of Government in emergency and crisis situations and to provide for national security. (S)

Revised and reissued material is filed under authority of Special Permission No. 92-798 of the F.C.C. and is deferred until November 29, 1992.

(This page filed under Transmittal No. 2238)

Issued: October 29, 1992

Effective: October 30, 1992

1010 Pine Street, St. Louis, Missouri 63101

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd) (M)10.2 Service Provisioning (T)

Services for command and control communications and for national security and emergency preparedness sometimes require short notice and short duration service provisions. These provisions are especially needed to meet presidential requirements or in response to natural, man-made, or declared emergencies. Requirements of this type cannot be forecasted and are usually needed for a relatively short period. (M)

(A) Provisioning Intervals (T)(1) Emergency Conditions

The services set forth in this section will be provided on the date requested or as soon as possible thereafter when the emergency falls into one of the following categories: (T)  
(M)

- (a) State of crisis declared by the National Command Authorities (includes commitments made to the National Communications System in the "National Plan for Emergencies and Major Disasters"). (T)  
(M)
- (b) Efforts to protect endangered U.S. personnel or property both in the U.S. and abroad (includes space vehicle recovery and protection efforts). (T)
- (c) Communications requirements resulting from hostile action, a major disaster or a major civil disturbance. (T)  
(M)
- (d) The director (Cabinet level) of a Federal department, Commander of a Unified/Specified Command, or head of a military department has certified that a communications requirement is so critical to the protection of life and property or to the National Defense that it must be processed immediately. (T)  
(M)

- 10.2 Service Provisioning (Cont'd) (T)
- (A) Provisioning Intervals (Cont'd)
- (1) Emergency Conditions (Cont'd)
- (e) Political unrest in foreign countries which affect the national interest. (T)  
(M)
- (f) Presidential service. (T)
- (2) The interval provisions in Section 5 (Ordering for Access Service) will apply when orders for services set forth in this section of the tariff are requested under conditions other than those described in (1) preceding.
- (B) Facility Availability (T)
- In order to insure communications during periods of emergency, the Telephone Company will, within the limits of good management, make available the necessary facilities to restore service in the event of damage or to provide temporary emergency service. (M)  
(M)
- (C) Temporary Facility Utilization (T)
- The provision of service under emergency conditions may require the availability of facilities, such as portable microwave equipment, which are provided on a temporary basis by the Telephone Company or customer. (T)  
(M)  
(M)
- (D) Utilization of Government Owned Facilities (T)
- In order to meet the requirements of agencies or branches of the Federal Government, the Telephone Company may utilize government-owned facilities when necessary to provide service. (M)  
(M)

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd) (M)10.3 Service Descriptions (Cont'd) (T)10.3.1 Voice Grade Special Access Service (T)

The provision of T-3 and G conditioned services contemplates station and tandem switching operations, using customer provided equipment, as well as Special Access Service. Separate metallic, telegraph or voice grade services, where required by the customer provided equipment or switching operation, are furnished in accordance with the applicable sections of this tariff. (M)

All Voice Grade Secure Communications provide an approximate bandwidth of 10-50,000 Hertz and can be used to transmit either voice frequency signaling or supervisory tones. (T)

(A) Voice Grade Secure Communications Type I

- Furnished on two-wire or four-wire metallic facilities for two-point secure communications between a customer premises location and an end user's premises. (T)  
(M)  
(M)
- The net loss of the conditioned service (with or without additional conditioning) shall not vary by more than four dB at 1,000 Hz from the levels specified following. (T)  
(M)  
(M)  
(T)

T-3 Conditioning - The absolute loss (referenced to one milliwatt) with respect to frequency shall not exceed: (M)  
(T)  
(M)

15 dB at 10 Hz  
13 dB at 100 Hz  
9 dB at 1,000 Hz  
20 dB at 10,000 Hz (M)  
30 dB at 50,000 Hz. (T)

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.4 Telecommunications Service Priority (TSP) System

The TSP System is a service, developed to meet the requirements of the Federal Government, which provides the regulatory, administrative, and operational framework for the priority installation and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications services. The TSP System is available for both Switched and Special Access Services, but its applicability is limited to Access Services that the Telephone Company can discreetly identify for priority provisioning and restoring. The TSP System applies only to NSEP telecommunications services, and requires and authorizes priority action by the Telephone Company providing such services.

The customer for TSP System service also must be the same customer for the Access Service with which it is associated. The customer, in obtaining TSP System service, acknowledges and consents to the provision of certain customer service record information by the Telephone Company to the National Communications System (NCS) in order for the NCS to maintain and administer its overall TSP System. This customer service record information will include only TSP System Authorization Code and Telephone Company Circuit/Service ID.

Under certain conditions it may be necessary to preempt one or more customer services with a lower or no restoration priority in order to install or restore NSEP telecommunications service of a higher priority. If such preemption is necessary, and if circumstances permit, the Telephone Company will make reasonable effort to notify the preempted service customer of the action being taken. Credit allowance for such service preemption shall be made in accordance with the provisions in 2.5.6(E) concerning Temporary Surrender of a Service. (T)

(This page filed under Transmittal No. 2400)

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.6 Government Emergency Telecommunications Service (GETS)

(N)

The Government Emergency Telecommunications Service (GETS) provides authorized federal government end users with a national security and emergency preparedness (NS/EP) switched voice and data communications service utilizing the public switched network through a special code(s) in the Telephone Company's end offices. GETS is activated at the request of the Federal Government or its authorized agent. GETS facilities may not be used for non-emergency government telecommunications, non-GETS services or by unauthorized end users.

GETS operates in conjunction with Switched Access Services provided under other provisions of this tariff. GETS charges will have a PIU of 100%. The credit allowance for service interruption for GETS is the same as for the Access Service with which it is associated as set forth in 2.5.6 (Credit allowance for Service Interruptions) and 2.5.7 (Service Assurance Warranty Schedule).

(A) Alternate Carrier Routing (ACR) Feature

GETS Alternate Carrier Routing (ACR) is an advanced network feature and is available where facilities exist in suitably equipped end offices. The GETS ACR feature provides for the routing of the GETS universal access number to a sequence of GETS carriers. GETS ACR allows NS/EP end users to use the public switched network to provide enhanced call completion capability on calls made during times of national emergencies or disasters. GETS ACR provides alternate route capability on calls originated from lines served by end offices equipped with the GETS ACR feature to the GETS universal access number. When the presubscribed carrier is a participating GETS carrier, GETS ACR enables calls first to be routed for completion to the presubscribed carrier of the originating line. When the presubscribed carrier is not a participating GETS carrier, then an office selection table (Ranking Table) determines the GETS carrier. The Ranking Table contains three alternatives for a GETS carrier and is preselected on a per end office basis using data provided by the Federal Government or its authorized agent.

Issued: June 17, 1996

Effective: August 1, 1996

One Bell Center, St. Louis, Missouri 63101

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.6 Government Emergency Telecommunications Service (GETS) (Cont'd)(B) Calling Party Number (CPN) Overlay Feature

Where technically feasible and facilities permit, the GETS Calling Party Number (CPN) Overlay feature is included with GETS ACR in suitably equipped GETS ACR end offices. The Federal Government or its authorized agent will determine the unique GETS CPN. The GETS CPN Overlay feature allows the network CPN information to be changed from the value of the actual calling party to a unique GETS number for all GETS ACR calls. The unique GETS CPN, not the actual calling party, is passed to the participating GETS carrier.

(C) Reports

There are two monthly reports available with GETS: Call Data Report and Service Control Point (SCP) Data Report.

(1) Call Data Report

The Call Data Report provides call detail associated with GETS ACR usage. The Call Data Report is populated using data from recordings of GETS calls.

(2) Service Control Point (SCP) Data Report

The SCP Data Report tabulates a count of the GETS carrier selection order list sent to the GETS ACR end offices for GETS calls that were processed. This report provides an aggregated total of each of the call categories by end office.

(D) High Probability of Connection (HPC) Feature

GETS HPC distinguishes the priority assigned to the call setup message in the Signaling System 7 (SS7) network. Setup messages associated with calls to 1-710-NCS-GETS would be sent with the highest priority. GETS HPC provides a trunk queuing feature in equipped switches which is invoked any time an Interexchange Carrier (IC) trunk group is busy. The queuing would only be applied to GETS calls and allows GETS users to dial an emergency call one time without having to redial. The call will automatically complete when the first available trunk becomes idle.

10.3 Service Descriptions (Cont'd)10.3.6 Government Emergency Telecommunications Service (GETS) (Cont'd)(D) High Probability of Connection (HPC) Feature (Cont'd)(1) GETS HPC Service Features(a) GETS Call Recognition

This feature provides the capability to recognize originating GETS calls from an administratable screen on the called number. The screen will be set on 710 on all switches and on four 800/888 numbers which provide access to GETS on specified switches only. A call recognized as a GETS call is said to be an HPC marked call.

(b) Trunk Group Queuing (TQ)

The feature provides the capability to queue HPC marked calls to specific trunk groups within the routing chain. Only HPC marked calls are allowed to queue.

(c) Exemption From Network Management Controls (EX-NMCs)

This feature provides HPC marked calls exemption from restrictive Network Management Controls.

(2) Reports

## Operational Measurement (OM) Report

The Operational Measurement (OM) report provides periodic implementation status updates and ongoing service verification. The data format is in the form of a series of time stamped OM registers for each of the HPC equipped switches.

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations

This section contains information related to the rate elements applicable to Federal Government Specialized Services or Arrangements. Rates and charges associated with these rate elements are listed in 10.5. The rates and charges for certain of these services shall be developed on an ICB basis and shall be consistent with the rates and charges for services offered in other sections of this tariff. Additional rates and charges may be applicable for other services which operate in conjunction with Special Routing Access Service, Telecommunications Service Priority (TSP) System and Government Emergency Telecommunications Service (GETS).

(T)  
(N)  
(N)(A) Federal Government Regulations

In accordance with Federal Government Regulations, all service provided to the Federal Government will be billed in arrears. However, this provision does not apply to other customers that obtain services under the provisions of this tariff to provide their services to the Federal Government.

(B) Mileage Application

Mileage, when used for rate application between two serving wire centers or between an end office switch and the customer's serving wire center, shall be determined by the V and H Coordinates Method as set forth in National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4 and administered as set forth in 6.8.5 (Determining Switched Transport Mileage and Charges), 7.2.6 (Mileage Measurement) or 20.4.7 (Determining Interoffice Mileage).

(C) Moves

The provisions set forth in 6.8.10 (Moves), 7.2.7 (Moves) and 20.4.12 (Moves) apply to moves involving services provided in this Section.

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd) (M)
- 10.4 Rate Regulations (Cont'd) (T)
- (D) Cancellation (T)
- A customer may cancel an order for Special Federal Government Access Service at any time prior to notification by the Telephone Company that service is available for the customer's use. (M)
- The regulations and charges set forth in 5.3.2 (Access Order Modification Charges) apply for the cancellation of Special Federal Government Access Services. (T)  
(M)
- (E) Special Routing Access Service (T)
- The Telephone Company will record Special Routing Access Service Active Mode usage, and will bill the customer in accordance with these records. In addition, a Special Routing Access Service Trunk Usage charge will apply for each hour the service is in the active mode. The hours for each trunk ordered will be summed and then rounded to the nearest hour, except that when the total is less than one hour, one hour will be used to determine the charge. (M)
- (F) Telecommunications Service Priority (TSP) System (T)
- (1) Rate Elements
- (a) Priority Installation (Provisioning): (T)
- The act of supplying telecommunications service to a customer, including all associated transmission, wiring, and equipment, if provided by the Telephone Company, at an earlier time than standard order intervals would allow. (M)

- 10.4 Rate Regulations (Cont'd) (T)
- (F) Telecommunications Service Priority (TSP) System (Cont'd)
- (1) Rate Elements (Cont'd)
- (b) Priority Restoration Level Implementation (Assignment): (T)
- The act of designating the priority level for the restoration of a particular NSEP telecommunications service. (M)
- (c) Priority Restoration Level Change: (T)
- The act of changing the priority level assignment for a NSEP telecommunications service. This includes any extension of an existing priority level assignment to an expanded NSEP service. (M)
- (d) Priority Restoration Administration and Maintenance: (T)
- The act of administering and maintaining the TSP System in such a manner that it corresponds to the NCS data base. (M)
- (2) Rate Application (T)
- The Priority Installation (PI) charge and the Priority Restoration (either Level Implementation or Level Change) (PR) charge are applied per circuit for Special Access Service and per line or trunk for Switched Access Service. PI and PR apply only one time per circuit or line except when there is subsequent order activity to add legs or lines to the service. One PI or PR will apply each time leg(s) or line(s) are added to an existing TSP System. When an Access Service is ordered with both PI and PR, the nonrecurring charge for PR Implementation applies. (M)

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd) (M)
- 10.4 Rate Regulations (Cont'd) (T)
- (F) Telecommunications Service Priority (TSP) System (Cont'd)
- (2) Rate Application (Cont'd)
- The Priority Restoration Level Change charge applies when the only TSP System order activity is that of changing priority levels. It applies each time the level is changed to a higher or a lower level. (T)  
(M)  
(M)
- The Administration and Maintenance charge applies per line or trunk for Switched Access Service and per circuit for Special Access Service. Each leg of a Special Access multipoint service will be treated as a separate circuit and the charge will apply on a per leg basis. (T)  
(M)  
(T)  
(M)  
(T)
- No TSP System charges apply to subsequent order activity that does not affect the TSP System assignment. When the TSP System is revoked, or discontinued, and the associated Access Service is continued in service, no charge applies for such a discontinuance. (T)  
(M)  
(T)  
(M)  
(M)
- (3) Quotation of Rates (T)
- When performing Priority Restoration (either Level Implementation or Level Change) and/or Priority Installation of an Access Service, the Telephone Company will attempt to notify the customer regarding certain Access Services where additional labor charges apply, as set forth in 13.4 (Rates and Charges), before the required additional labor is undertaken. The customer, in obtaining a Priority Restoration, recognizes that quoting charges and obtaining permission to proceed with the restoration of certain Access Services may cause unnecessary delays and, as a result, would be contrary to the aforementioned regulations. (M)

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(F) Telecommunications Service Priority (TSP) System (Cont'd)(3) Quotation of Rates (Cont'd)

In subscribing to TSP System service the customer recognizes this condition, grants the Telephone Company the right to quote charges after the restoration or installation is completed, and agrees to pay the charges.

(4) Credit Allowance

The credit allowance for service interruption for the TSP System is the same as for the Access Service with which it is associated as set forth in 2.5.6 (Credit Allowance for Service Interruptions). (T)

(5) Access Order Charges

Access Order Charges as set forth in 5.3.1 (Access Order Charges) apply to the TSP System.

(6) Expedited Priority Installaion (Emergency or Essential)

Regulations, rates and charges are the same as those set forth in 5.3.2(C) (Expedited Order Charge) for the Switched or Special Access Service for which Priority Installation is required.

(7) Utilizing Specially Constructed Facilities for Priority Installation

Regulations, rates and charges are the same as those set forth in this Company's Tariff F.C.C. No. 69 for Special Construction of the facilities for Switched or Special Access Service for which Priority Installation is required.

(This page filed under Transmittal No. 2400)

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements(Cont'd)10.4 Rate Regulations (Cont'd)(G) Federal Government Telecommunications Services (FGTS)(1) General

This section contains regulations, rates and charges applicable to the provision of FGTS to those Interexchange Carriers who have won the right to provide telecommunications service to the General Services Administration (GSA) and other Government agencies, including the agencies themselves as end users, for the sole use of the GSA and other such agencies. This section of the tariff does not apply to agencies that have not been awarded the special government contract. (C)

Except as specifically noted below, all rules and regulations applicable to the rate elements provided under a monthly service arrangement (as set forth in Sections 7, 19 & 20 of this tariff) apply to those rate elements provided under FGTS. Rate elements not listed in 10.5.5 (Federal Government Telecommunications Service (FGTS)) are not available under FGTS and must be purchased as set forth in Sections 7, 19 & 20 of this tariff. Exceptions and/or additions to these rules and regulations as set forth in this section supersede those in other sections of this tariff. (C)

If the Telephone Company initiates rate changes resulting in a decrease of rates for existing service with a 1 or 3 year service period, those rate changes will be passed along to the customer. Rate changes resulting in an increase of rates for an existing service with a 1 or 3 year service period will not exceed the original rate for that selected service period. Rate changes may occur as a result of F.C.C. action.

(2) Ordering

FGTS is provided as a monthly service arrangement with a 1 year or 3 year service period (Initial Service Period) for MegaLink Data Service or a 3 year service period (Initial Service Period) for Voice Grade 4 wire Service, High Capacity Service, MegaLink Custom Service, Self-Healing Transport Service and ReliaNet<sup>sm</sup> Service. (C)

For services ordered under FGTS, only the Access Order Charge as set forth in 5.3.1 (Access Order Charges) will apply. All other nonrecurring charges will be waived until August 31, 2002. (C)

(This page filed under Transmittal No. 2775)

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements(Cont'd)10.4 Rate Regulations (Cont'd)(G) Federal Government Telecommunications Services (FGTS)(Cont'd)(2) Ordering (Cont'd)

When a rate element is ordered under FGTS, that rate element may not be used for non-FGTS services. No portion of a multiplexed rate element (High Capacity - DS1, MegaLink Custom - DS3, STN or ReliaNet<sup>sm</sup>) may be under FGTS unless the entire rate element is available under FGTS.

(C)

(C)

(3) Renewal of Service

The customer must provide the Telephone Company with a written notice of intent to renew or extend FGTS no later than 90 days prior to the expiration of the service period.

The customer may elect to renew the FGTS three year service periods only at the FGTS three year rate in effect at the time of renewal.

(C)

(C)

(D)

(D)

If the customer elects not to renew FGTS or does not notify the Telephone Company of its intent to renew FGTS, the customer's FGTS rate elements will revert to the monthly rates in effect, as set forth in Sections 7, 19 and 20, at the time the FGTS expires.

(C)

(C)

(C)

(4) Termination Charges

In the event service is terminated prior to the expiration of the Initial Service Period, termination charges will apply with the following exception. No termination charges will apply in the first year of the 3 year service period only, due to conditions in the government FGTS contract. After the first year, termination charges will apply as set forth following.

(C)

(C)

FGTS services are not subject to a termination liability charge for any services disconnected at the request of the Federal Government during the life of the contract. In the event service is terminated by an Interexchange Carrier termination charges will apply. The regulations and charges set forth in 5.3.2 (Access Order Modification Charges) apply for the cancellation of services provided under FGTS.

(C)

(C)

Certain material previously appearing on this page now appears on the 3rd Revised Page 10-18.3.

(This page filed under Transmittal No. 2775)

## ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements(Cont'd)10.4 Rate Regulations (Cont'd)(I) Federal Government Telecommunications Service (FGTS)(Cont'd)(4) Termination Charges (Cont'd)

(M)

If Special Construction applied for the service being terminated, any associated termination charges, as referenced in 5.2.6 (C) (Special Construction), may apply. (M)

(a) Initial Service Period

The termination charge for the Initial Service Period is calculated as follows:

Billed Monthly Rate	X	Months remaining in service period	X	Termination percentage.
------------------------	---	---------------------------------------	---	----------------------------

Years in Service Period	Termination Percentage
-------------------------	------------------------

1	50%	(C)
3	40%	(C)

Example: A customer with a \$2,000 monthly rate terminates service with 5 months remaining in a 3 year service period. The termination charge would be calculated as follows:

$\$2,000 \times 5 \times .40 = \$4,000$  (C)

The termination charge would be \$4,000. (C)

Certain material on this page previously appeared on the 4th Revised Page 10-18.2.

12. Specialized Service or Arrangements

(M)

12.1 General Description

(T)

Specialized Service or Arrangements are those which are not offered under other sections of this tariff. The facilities utilized to provide these services are of a type normally used by the Telephone Company in furnishing its other services and shall be compatible with other Telephone Company services, and its engineering and maintenance practices. The requested service or arrangement is provided within a LATA and is subject to the availability of the necessary Telephone Company personnel and capital resources.

<u>Case No.</u>	<u>Customer Name</u>	<u>Description</u>	<u>Monthly Rate</u>	<u>Nonrecurring Charges</u>
95-IDL-82173	Sabre Group-For Airlines	Provides 362.88 Mbps of protected bandwidth in a Ring Architecture to the following address: 1116 Houston St., Ft. Worth, TX., 901 Main, Dallas, TX., 4211 Bryan, Dallas, TX., 4200 American Blvd, 4700 American Blvd, Ft. Worth, TX and 4255 Amon Carter Blvd., Ft. Worth, TX.	\$29,750.00 (R)	(T)
98-IDL-76163C	Airlines			(T)
(1)				(N)
		Case Preparation Charge	\$ 1,875.00	
		Case Preparation Charge	\$ 1,875.00	(N)

- (1) The billing period for this service is 60 months. In the event this service is terminated prior to the end of the billing period, Sabre Group/ American Airlines will pay the Telephone Company the net present value of all remaining payments, calculated with a discount rate equal to the Telephone Company's interstate special access rate of return authorized by the F.C.C. at the time of termination. The termination charge is calculated using the following present value formula: (C)

$$\text{Present value} = \frac{\text{Rate} \times (1 - (i)^{-n})}{i}$$

Rate = monthly recurring rate

n = total number of months remaining for the service

i = monthly interest rate (discount rate) expressed as a decimal

(This page filed under Transmittal No. 2751)

(1)	Service Expiration Date: October 26, 2004				(C)
(2)	The billing period for this service is 60 months. In the event this service is terminated prior to the end of the billing period, AT&T Communications will pay the Telephone Company the net present value of all remaining payments, calculated with a discount rate equal to the Telephone Company's interstate special access rate of return authorized by the F.C.C. at the time of termination. The termination charge is calculated using the following value formula:				(C)

$$\text{Present Value} = \frac{\text{Rate} \times (1-(+i)^{-n})}{i}$$

Rate = monthly recurring rate

n = total number of months remaining for the service

i = monthly interest rate (discount rate) expressed as a decimal

In the event this Service becomes the subject of a general tariff service offering, AT&T Communications shall be required to either terminate the Service or convert the Service to the general tariff offering at the rates, terms and conditions provided thereunder. No termination charges shall apply in either instance.

The termination charge is calculated using the following value formula:

$$\text{Present Value} = \frac{\text{Rate} \times (1 - (1+i)^{-n})}{i}$$

Rate = monthly recurring rate

n = total number of months remaining for the service

i = monthly interest rate (discount rate) expressed as a decimal

(3) In the event this Service becomes the subject of a general tariff service offering, MDREnet/SOM shall be required to either terminate the Service or convert the Service to the general tariff offering at the rates, terms and conditions provided thereunder. No termination charges shall apply in either instance.

(4) This Charge is applicable for each installation of the Interface Processor Router.

(5) The system design can not exceed the capacity of the Router.

## ACCESS SERVICE

12. Specialized Service or Arrangements (Cont'd)12.3 Rates and Charges (Cont'd)

Case No.	Customer Name	Volume Tier*	Monthly Rate for each Active Port	(C) (C)
00-SBC-1	UUNET Technologies, Inc.	1 - 400,000	\$25.50	(N)
		400,001 - 500,000	\$24.50	
		500,001 - +	\$24.00	

Description

Remote Access Service (RAS) provides an ISDN PRI-based data transport service that supports UUNET Technologies, Inc. ("UUNET") with medium to high speed transport capabilities for end user remote dial access to UUNET's internet network. RAS terminates in network access servers in Southwestern Bell Telephone Company's central offices, which provide modem functionality. The connections between the central office and UUNET's network are not part of RAS. UUNET will acquire these services separately.

UUNET agrees to maintain a minimum of 300,000 active ports each month beginning with the first day of the seventh (7<sup>th</sup>) month after the Tariff Effective Date ("Minimum Commitment Date"). UUNET agrees to pay a monthly rate on a per port basis as outlined in the volume tier listed above. The volume tier is an aggregation of ports ordered by UUNET through the tariffs and in the territories of Southwestern Bell Telephone Company, Pacific Bell Telephone Company, The Southern New England Telephone Company, Ameritech Operating Companies, and Nevada Bell (hereinafter referred to as The Telephone Companies). In the event that UUNET does not have 300,000 active ports during a given month after the Minimum Commitment Date, UUNET agrees to pay The Telephone Companies the monthly rate for 300,000 ports in each such month regardless of the actual number of active ports. This minimum purchase commitment shall expire as of the end of month fifty-four (54) after the Tariff Effective Date.

1. In the event this service becomes the subject of a general tariff service offering, UUNET shall be required to either terminate the service or convert the service to the general tariff offering at the rates, terms and conditions provided thereunder; No termination charges shall apply in either instance.
